100 pieces double-sided adhesive dots Ø 10 mm - no magnet!

Product number: DKP-10

Easy handling and perfect result

- high adhesive strength
- very good aging resistance
- solvent-free adhesives
- easy to apply

Product features:

- excellent aging, weather and UV resistance
- has a dampening effect
- compensates for lower thickness tolerances

Product structure:

- Carrier material: PE foam, white
- Adhesive: Solvent-pure acrylate
- Thickness (without cover): 0.950 mm
- Cover: silicon paper
- Thickness (without carrier) only 0.110 mm

Efficiency:

- Shear strength: > 120 h at 10 kg / 625 mm²
- Peel strength: > 13 N / 25 mm
- Application temperature: - 40 ° C to + 80 ° C, briefly up to 140 ° C

Please note:
The following applies to assembly with this product:

- at least 70 cm² of adhesive tape per 1 kg of weight
- The connection is only loaded after 24 hours
- Recommended processing temperature: 18 ° C to 35 ° C
- Shelf life: 6 months (at 23 ° C and max. 70 % relative humidity)

Please note our general processing instructions when processing!

Technical specifications

Weight:	5,9 g

Production information and safety instructions

The product conforms to the European RoHS Community legislation

The product conforms to the European RoHS Community legislation (2002/95/EC - RoHS - Restriction of Hazardous Substances) relating to the use and the employment of certain hazardous substances in electrical and electronic devices.

⚠ Please observe our safety instructions for this product.

Manufacturer: magnets4you GmbH, Bgm.-Dr.-Nebel-Str. 15a, 97816 Lohr a. Main, Deutschland, service@magnet-shop.net

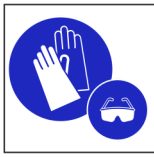
Important safety instructions for handling our magnets!

Permanent magnets and magnetic materials require special precautions. Please read the instructions carefully before use. If you have any further questions, please feel free to contact us. The company „magnets4you GmbH“ rejects any liability arising from improper handling of the magnets.

Handling

Increased caution with children:
Keep magnets away from children! Danger of swallowing and serious injuries!



When handling strong magnets, pay attention to appropriate safety measures and protective clothing. Before use, remove all magnetic objects and use protective gloves and glasses.

No mechanical processing and collisions!
Incorrect handling of the magnets leads to a loss of the magnetic effect and to the destruction of the magnet. In addition, highly flammable drilling dust and other significant health risks are caused by the following hazards.

Danger from magnets

Injuries
Improper handling of magnets can lead to bruises, contusions, or even broken bones.

Splinters
Magnets are brittle. Collisions cause small parts to splinter, which leads to health hazards and damage to the magnet.

Magnetic fields
Strong magnets can endanger and destroy electronic and mechanical components (pacemakers, data carriers, credit cards, electronic devices, etc.).

Persons with cardiac pacemakers must not expose themselves to magnetic fields.

Other Risks
- Many magnets have coatings that some people are allergic to. You should therefore avoid excessive skin contact with raw magnets
- Health hazards when they encounter food and drinking water. Only use magnets that are specifically designed for this area!

Transportation and shipping

When shipping magnets, applicable regulations for stray magnetic fields during air transport must be observed (IATA dangerous goods regulations). These provisions also apply to built-in magnets.
