MAGFORMERS - Basic Line Set 62 pieces magnetic set 274-09

Product number: MAGFO-09

Great educational magnet construction material for playfully learning 3D and geometry shapes. Kids play with this material repeatedly. Various 3D models can be created according to pictures, instructions or even by yourself.

Content:
12 x pentagon
30 x square
20 x triangle
1 x Ideas - brochure

Number of pieces: 62

Material:
Plastic with neodymium magnet

Cleaning advice:
Please clean your Magformers only with a damp cloth and without adding any harsh cleaning agents.

Attention:
This product contains magnets. Swallowing magnets can be fatal.
If magnets are swallowed, call an emergency doctor immediately.
Suitable for children from 3 years.

Technical specifications

Lenght:	300 mm	**Width:**	50 mm
Height H:	320 mm	**Material:**	Neodymium
Weight:	1,1 kg		

Production information and safety instructions

⚠ Please observe our safety instructions for this product.

Manufacturer:	Magformers LLC, 417 FOREST AVE, US-48170-1721 PLYMOUTH
Responsible:	Magformers GmbH, Carl-Zeiss-Straße 37, 63322 Rödermark, www.magformers.de

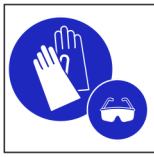
Important safety instructions for handling our magnets!

Permanent magnets and magnetic materials require special precautions. Please read the instructions carefully before use. If you have any further questions, please feel free to contact us. The company „magnets4you GmbH“ rejects any liability arising from improper handling of the magnets.

Handling

Increased caution with children:
Keep magnets away from children! Danger of swallowing and serious injuries!



When handling strong magnets, pay attention to appropriate safety measures and protective clothing. Before use, remove all magnetic objects and use protective gloves and glasses.

No mechanical processing and collisions!
Incorrect handling of the magnets leads to a loss of the magnetic effect and to the destruction of the magnet. In addition, highly flammable drilling dust and other significant health risks are caused by the following hazards.

Danger from magnets

Injuries
Improper handling of magnets can lead to bruises, contusions, or even broken bones.

Splinters
Magnets are brittle. Collisions cause small parts to splinter, which leads to health hazards and damage to the magnet.

Magnetic fields
Strong magnets can endanger and destroy electronic and mechanical components (pacemakers, data carriers, credit cards, electronic devices, etc.).

Persons with cardiac pacemakers must not expose themselves to magnetic fields.

Other Risks
- Many magnets have coatings that some people are allergic to. You should therefore avoid excessive skin contact with raw magnets
- Health hazards when they encounter food and drinking water. Only use magnets that are specifically designed for this area!

Transportation and shipping

When shipping magnets, applicable regulations for stray magnetic fields during air transport must be observed (IATA dangerous goods regulations). These provisions also apply to built-in magnets.
