Magnetic knife block made of beech wood for max. 6 chef's knives

Product number: MEBL-08

Magnetic knife block with 3 elements made of naturally lacquered beech wood.
Made in Italy by Artelegno.

This aesthetic knife block offers space for a maximum of 6 chef's knives with a maximum blade length of 29 cm.
The knives are held by the embedded magnets.
Four non-slip rubber feet ensure a secure stand.

Observe the following instructions to ensure a long service life:

- Avoid direct or close contact with heat sources.
- Do not stick wet or dirty knives to the block.
- Do not immerse this product. Do not put it under running water or in the dishwasher.
- Use a damp cloth or sponge for cleaning.
- Use only mild liquid detergent if necessary.
- Avoid contact of products that contain magnets with electronic devices and magnetized cards.

Dimensions:
Stand area: 23.5 cm x 12.5 cm (WxD)
Height: 21.5 cm
Overall dimensions: 23.5 cm x 12.5 cm x 21.5 cm

Since this article is made of wood, there may be slight deviations between the product images shown and the goods delivered.
The block with knives is shown on some article pictures.
These knives are for illustrative purposes and are not included!

Technical specifications

Lenght:	125 mm	**Width:**	260 mm
Height H:	260 mm	**Material:**	Beechwood
Weight:	1800 g		

Production information and safety instructions

The product conforms to the European RoHS Community legislation

The product conforms to the European RoHS Community legislation (2002/95/EC - RoHS - Restriction of Hazardous Substances) relating to the use and the employment of certain hazardous substances in electrical and electronic devices.

⚠ Please observe our safety instructions for this product.

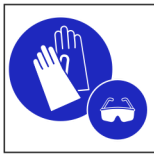
Important safety instructions for handling our magnets!

Permanent magnets and magnetic materials require special precautions. Please read the instructions carefully before use. If you have any further questions, please feel free to contact us. The company „magnets4you GmbH“ rejects any liability arising from improper handling of the magnets.

Handling

Increased caution with children:
Keep magnets away from children! Danger of swallowing and serious injuries!



When handling strong magnets, pay attention to appropriate safety measures and protective clothing. Before use, remove all magnetic objects and use protective gloves and glasses.

No mechanical processing and collisions!
Incorrect handling of the magnets leads to a loss of the magnetic effect and to the destruction of the magnet. In addition, highly flammable drilling dust and other significant health risks are caused by the following hazards.

Danger from magnets

Injuries
Improper handling of magnets can lead to bruises, contusions, or even broken bones.

Splinters
Magnets are brittle. Collisions cause small parts to splinter, which leads to health hazards and damage to the magnet.

Magnetic fields
Strong magnets can endanger and destroy electronic and mechanical components (pacemakers, data carriers, credit cards, electronic devices, etc.).

Persons with cardiac pacemakers must not expose themselves to magnetic fields.

Other Risks
- Many magnets have coatings that some people are allergic to. You should therefore avoid excessive skin contact with raw magnets
- Health hazards when they encounter food and drinking water. Only use magnets that are specifically designed for this area!

Transportation and shipping

When shipping magnets, applicable regulations for stray magnetic fields during air transport must be observed (IATA dangerous goods regulations). These provisions also apply to built-in magnets.
