Magnetic labels magnetic signs 120 x 30 mm, writable, white | 120 x 30 mm

Product number: MF-120x30x0.6-W

With writable magnetic labels, your organization will be an easy game.
Perfect if you have wanted to create a perfect order for a long time!

Whether in the household, in the workshop as flexible labeling of storage shelves, in th
magnetic boards, for example for vacation planning - with these practical organizationa
Whether professional or private, these organizational talents are indispensable.

The labels are cut from white coated magnetic foil.

Use of magnetic labels:
The labels adhere to metallic surfaces. This also includes magnetic stainless steel - the thicker the metallic base, the stronger the adhesive force. Thanks to the flexible base material, the labels can also stick to slightly round surfaces.

Important instructions:
Magnetic foils cannot be used as a base for magnets.

The magnetic labels do not adhere to aluminum.

The magnetic strips are supplied in packaging units of 50 pieces.

Technical specifications

Lenght:	120 mm	**Width:**	30 mm
Height H:	0,6 mm	**Weight:**	6,9 g

Production information and safety instructions

⚠ Please observe our safety instructions for this product.

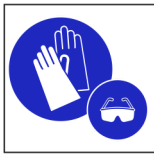
Important safety instructions for handling our magnets!

Permanent magnets and magnetic materials require special precautions. Please read the instructions carefully before use. If you have any further questions, please feel free to contact us. The company „magnets4you GmbH“ rejects any liability arising from improper handling of the magnets.

Handling

Increased caution with children:
Keep magnets away from children! Danger of swallowing and serious injuries!



When handling strong magnets, pay attention to appropriate safety measures and protective clothing. Before use, remove all magnetic objects and use protective gloves and glasses.

No mechanical processing and collisions!
Incorrect handling of the magnets leads to a loss of the magnetic effect and to the destruction of the magnet. In addition, highly flammable drilling dust and other significant health risks are caused by the following hazards.

Danger from magnets

Injuries
Improper handling of magnets can lead to bruises, contusions, or even broken bones.

Splinters
Magnets are brittle. Collisions cause small parts to splinter, which leads to health hazards and damage to the magnet.

Magnetic fields
Strong magnets can endanger and destroy electronic and mechanical components (pacemakers, data carriers, credit cards, electronic devices, etc.).

Persons with cardiac pacemakers must not expose themselves to magnetic fields.

Other Risks
- Many magnets have coatings that some people are allergic to. You should therefore avoid excessive skin contact with raw magnets
- Health hazards when they encounter food and drinking water. Only use magnets that are specifically designed for this area!

Transportation and shipping

When shipping magnets, applicable regulations for stray magnetic fields during air transport must be observed (IATA dangerous goods regulations). These provisions also apply to built-in magnets.
