

silwy Magnetic drinking cups Pearl Gray with nano gel pads, Set of 2 | Pearl Grey

Product number: SIL-06

silwy magnetic drinking cups with nano gel pads, set of 2

YOUR ADVANTAGE: Stable and unbreakable magnetic drinking cup

MATERIAL: HIGH-TECH plastic

PERFECTION: High-quality, tested plastic (BPA-free)

CLEVER: Pads & drinking cup perfectly balanced

INCREDIBLE: Nano gel pads are removable without leaving any residue

SMART: Pads are washable & reusable

RECOMMENDATION: Apply pads to sealed surfaces

START-UP: Support our young team & become a silwy fan

TIP: Store away on the wall / ceiling only with our strip

Scope of delivery:

2 drinking cups 250 ml with magnet and 2 metallic, non-slip gel coasters

Technical specifications

Filling quantity:

250 ml

Production information and safety instructions

⚠ Please observe our safety instructions for this product.

Manufacturer:

maglassX GmbH, Spagl-Str. 2, 94161 Hutthurm. www.silwy.de

Important safety instructions for handling our magnets!

Permanent magnets and magnetic materials require special precautions. Please read the instructions carefully before use. If you have any further questions, please feel free to contact us. The company „magnets4you GmbH“ rejects any liability arising from improper handling of the magnets.

Handling

Increased caution with children:

Keep magnets away from children! Danger of swallowing and serious injuries!

When handling strong magnets, pay attention to appropriate safety measures and protective clothing. Before use, remove all magnetic objects and use protective gloves and glasses.

No mechanical processing and collisions!

Incorrect handling of the magnets leads to a loss of the magnetic effect and to the destruction of the magnet. In addition, highly flammable drilling dust and other significant health risks are caused by the following hazards.

Danger from magnets

Injuries

Improper handling of magnets can lead to bruises, contusions, or even broken bones.

Splinters

Magnets are brittle. Collisions cause small parts to splinter, which leads to health hazards and damage to the magnet.

Magnetic fields

Strong magnets can endanger and destroy electronic and mechanical components (pacemakers, data carriers, credit cards, electronic devices, etc.).

Persons with cardiac pacemakers must not expose themselves to magnetic fields.

Other Risks

- Many magnets have coatings that some people are allergic to. You should therefore avoid excessive skin contact with raw magnets
- Health hazards when they encounter food and drinking water. Only use magnets that are specifically designed for this area!

Transportation and shipping

When shipping magnets, applicable regulations for stray magnetic fields during air transport must be observed (IATA dangerous goods regulations). These provisions also apply to built-in magnets.
