silwy Magnetic plastic glasses LONGDRINK gray with nano gel pads, Set of 2

Product number: SIL-14

silwy Magnetic plastic glasses LONGDRINK gray with nano gel pads, Set of 2

YOUR ADVANTAGE: Fine drinks from stable magnetic glasses
MATERIAL: HIGH-TECH plastic, SCRATCH-RESISTANT
PERFECTION: Shapely encapsulated magnet in the bottom of the glass
100% QUALITY: Finest, unbreakable HIGH-TECH plastic
CLEVER: Perfectly balanced: Nano gel pad & magnetic glass
INCREDIBLE: Nano gel pads are removable without leaving any residue
SMART: Pads are washable & reusable
RECOMMENDATION: Apply pads to sealed surfaces
START-UP: Support our young team & become a silwy fan
TIP: Our strip is required for storage on the wall/ceiling

Scope of delivery:
2 long drink glasses gray 300 ml with magnet and 2 metal nano gel pads

g

Technical specifications

Diameter:	88 mm	**Height H:**	141 mm
Filling quantity:	300 ml	**Weight:**	720 g

Production information and safety instructions

The product conforms to the European RoHS Community legislation

The product conforms to the European RoHS Community legislation (2002/95/EC - RoHS - Restriction of Hazardous Substances) relating to the use and the employment of certain hazardous substances in electrical and electronic devices.

⚠ Please observe our safety instructions for this product.

Manufacturer:	maglassX GmbH, Spagl-Str. 2, 94161 Hutthurm. www.silwy.de

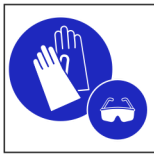
Important safety instructions for handling our magnets!

Permanent magnets and magnetic materials require special precautions. Please read the instructions carefully before use. If you have any further questions, please feel free to contact us. The company „magnets4you GmbH“ rejects any liability arising from improper handling of the magnets.

Handling

Increased caution with children:
Keep magnets away from children! Danger of swallowing and serious injuries!



When handling strong magnets, pay attention to appropriate safety measures and protective clothing. Before use, remove all magnetic objects and use protective gloves and glasses.

No mechanical processing and collisions!
Incorrect handling of the magnets leads to a loss of the magnetic effect and to the destruction of the magnet. In addition, highly flammable drilling dust and other significant health risks are caused by the following hazards.

Danger from magnets

Injuries
Improper handling of magnets can lead to bruises, contusions, or even broken bones.

Splinters
Magnets are brittle. Collisions cause small parts to splinter, which leads to health hazards and damage to the magnet.

Magnetic fields
Strong magnets can endanger and destroy electronic and mechanical components (pacemakers, data carriers, credit cards, electronic devices, etc.).

Persons with cardiac pacemakers must not expose themselves to magnetic fields.

Other Risks
- Many magnets have coatings that some people are allergic to. You should therefore avoid excessive skin contact with raw magnets
- Health hazards when they encounter food and drinking water. Only use magnets that are specifically designed for this area!

Transportation and shipping

When shipping magnets, applicable regulations for stray magnetic fields during air transport must be observed (IATA dangerous goods regulations). These provisions also apply to built-in magnets.
