

silwy Self-adhesive metal strip with artificial leather cover

25 cm | White

Product number: SIL-51

silwy Self-adhesive metal strip with artificial leather cover 25 cm

YOUR ADVANTAGE: Storage system for silwy plastic and crystal glasses

TIP: Can be combined with silwy magnetic hooks & pins (holds up to 10 kg)

MATERIAL: Very high-quality leather look WHITE or BLACK

100% QUALITY: High adhesive power thanks to special metal core

CLEVER: Completely new, space-saving storage solutions

INCREDIBLE: Upside down, vertical & horizontal an eye-catcher

SMART: Permanent and easy installation with 3M adhesive layer

Scope of delivery:

1 metal strip 25 cm white or black with 3M adhesive layer

Technical specifications

Length:	250 mm	Width:	50 mm
Height H:	3 mm	Material:	Imitation leather
Weight:	240 g

Important safety instructions for handling our magnets!

Permanent magnets and magnetic materials require special precautions. Please read the instructions carefully before use. If you have any further questions, please feel free to contact us. The company „magnets4you GmbH“ rejects any liability arising from improper handling of the magnets.

Handling

Increased caution with children:

Keep magnets away from children! Danger of swallowing and serious injuries!

When handling strong magnets, pay attention to appropriate safety measures and protective clothing. Before use, remove all magnetic objects and use protective gloves and glasses.

No mechanical processing and collisions!

Incorrect handling of the magnets leads to a loss of the magnetic effect and to the destruction of the magnet. In addition, highly flammable drilling dust and other significant health risks are caused by the following hazards.

Danger from magnets

Injuries

Improper handling of magnets can lead to bruises, contusions, or even broken bones.

Splinters

Magnets are brittle. Collisions cause small parts to splinter, which leads to health hazards and damage to the magnet.

Magnetic fields

Strong magnets can endanger and destroy electronic and mechanical components (pacemakers, data carriers, credit cards, electronic devices, etc.).

Persons with cardiac pacemakers must not expose themselves to magnetic fields.

Other Risks

- Many magnets have coatings that some people are allergic to. You should therefore avoid excessive skin contact with raw magnets
- Health hazards when they encounter food and drinking water. Only use magnets that are specifically designed for this area!

Transportation and shipping

When shipping magnets, applicable regulations for stray magnetic fields during air transport must be observed (IATA dangerous goods regulations). These provisions also apply to built-in magnets.
