School blackboard paint Dupli-Color - 750 ml, green | Green

Product number: STF-750.00002

A 0.5 liter can is enough for about 1-1.5 square meters with 2 coats
A 1.0 liter can is enough for about 2-3 square meters with 2 coats
A 2.5 liter can is enough for about 5-7 square meters with 2 coats

Bring wonderful design spaces into the children's room with the special blackboard paint from the magnet-shop.net range. In no time a wall becomes a creative surface on which the youngest can let off steam with chalk. And that with the highest quality and without questionable ingredients. Turn the wall into a school blackboard with the Dupli Color blackboard paints!

Product Information

With the wall blackboard paint Dupli Color in the colors green and black you get a special effect with which your children can write on a surface with chalk after use. The blackboard paint is mainly suitable for smooth surfaces in the interior (walls, doors, furniture). Possible substrates are:

- Wood
- Metal
- Paintable plastics
- Smooth wallpapers
- Masonry
- Plaster
- Concrete

Although the Dupli Color blackboard paint itself is not magnetic, you can easily apply magnetic paint to it (attention: the blackboard paint should dry for at least two weeks beforehand). In no time at all, you can create a great opportunity to use the wall for a wide variety of purposes and at the same time create a place where your children can develop creatively.

Blackboard paint for best results

The black and green chalkboard paint dries quickly and can also be diluted with water. Thanks to its environmentally friendly and low-odor composition, the Dupli Color blackboard paint is suitable for every room in the house. The easy processing and the high opacity make this wall blackboard paint an excellent product for a first-class result.

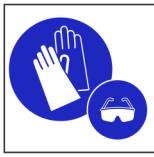
Important safety instructions for handling our magnets!

Permanent magnets and magnetic materials require special precautions. Please read the instructions carefully before use. If you have any further questions, please feel free to contact us. The company „magnets4you GmbH“ rejects any liability arising from improper handling of the magnets.

Handling

Increased caution with children:
Keep magnets away from children! Danger of swallowing and serious injuries!



When handling strong magnets, pay attention to appropriate safety measures and protective clothing. Before use, remove all magnetic objects and use protective gloves and glasses.

No mechanical processing and collisions!
Incorrect handling of the magnets leads to a loss of the magnetic effect and to the destruction of the magnet. In addition, highly flammable drilling dust and other significant health risks are caused by the following hazards.

Danger from magnets

Injuries
Improper handling of magnets can lead to bruises, contusions, or even broken bones.

Splinters
Magnets are brittle. Collisions cause small parts to splinter, which leads to health hazards and damage to the magnet.

Magnetic fields
Strong magnets can endanger and destroy electronic and mechanical components (pacemakers, data carriers, credit cards, electronic devices, etc.).

Persons with cardiac pacemakers must not expose themselves to magnetic fields.

Other Risks
- Many magnets have coatings that some people are allergic to. You should therefore avoid excessive skin contact with raw magnets
- Health hazards when they encounter food and drinking water. Only use magnets that are specifically designed for this area!

Transportation and shipping

When shipping magnets, applicable regulations for stray magnetic fields during air transport must be observed (IATA dangerous goods regulations). These provisions also apply to built-in magnets.
